Rensino Feed Additives Co.,Ltd
china-feedadditives.com

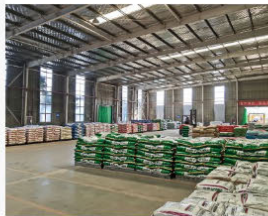

In 2014, Rensino Feed Additives Co., Ltd. invested more than 80 million yuan to build a large, modern feed production base in Tangdong East Road, Tianhe District, Doumen District, Zhuhai City, Guangdong Province, China. The factory covers an area of 60 acres, with a construction area of over 20,000 square meters. It is equipped with two large-scale automated premix and concentrated feed production lines featuring artificial intelligence. The annual production and sales include 15,000 tons of various livestock and poultry premix and 20,000 tons of concentrated feed. The product range covers feed for pigs, laying hens, laying ducks, egg geese, broilers, meat ducks, meat geese, breeding chickens, breeding ducks, breeding geese, cattle, and sheep.

With technical support from three PhDs and 16 experts and professors, Rensino Feed Additives Co., Ltd. relies on international cutting-edge animal nutrition technology to produce high-quality feed products. The company provides feed additives, premixed feed, micro-ecological preparations, and formula technical services to more than 30,000 livestock and poultry farms and distributors. With 25 years of mature livestock premix technology and production management experience, the company ensures quality by using advanced testing instruments and laboratory equipment. All incoming raw materials undergo strict inspection, and finished products are thoroughly tested before entering the market.

For years, Rensino Feed Additives Co., Ltd. has consistently met quality standards during random inspections by relevant departments, earning praise and trust from users across various provinces and cities. The company is registered with customs authorities and possesses export qualifications. Its products have been sold across more than 20 provinces and cities in China and exported to over a dozen countries in Southeast Asia, South Africa, South America, the Middle East, and India. The company has also received numerous honorary titles and medals awarded by relevant management authorities.

interventions

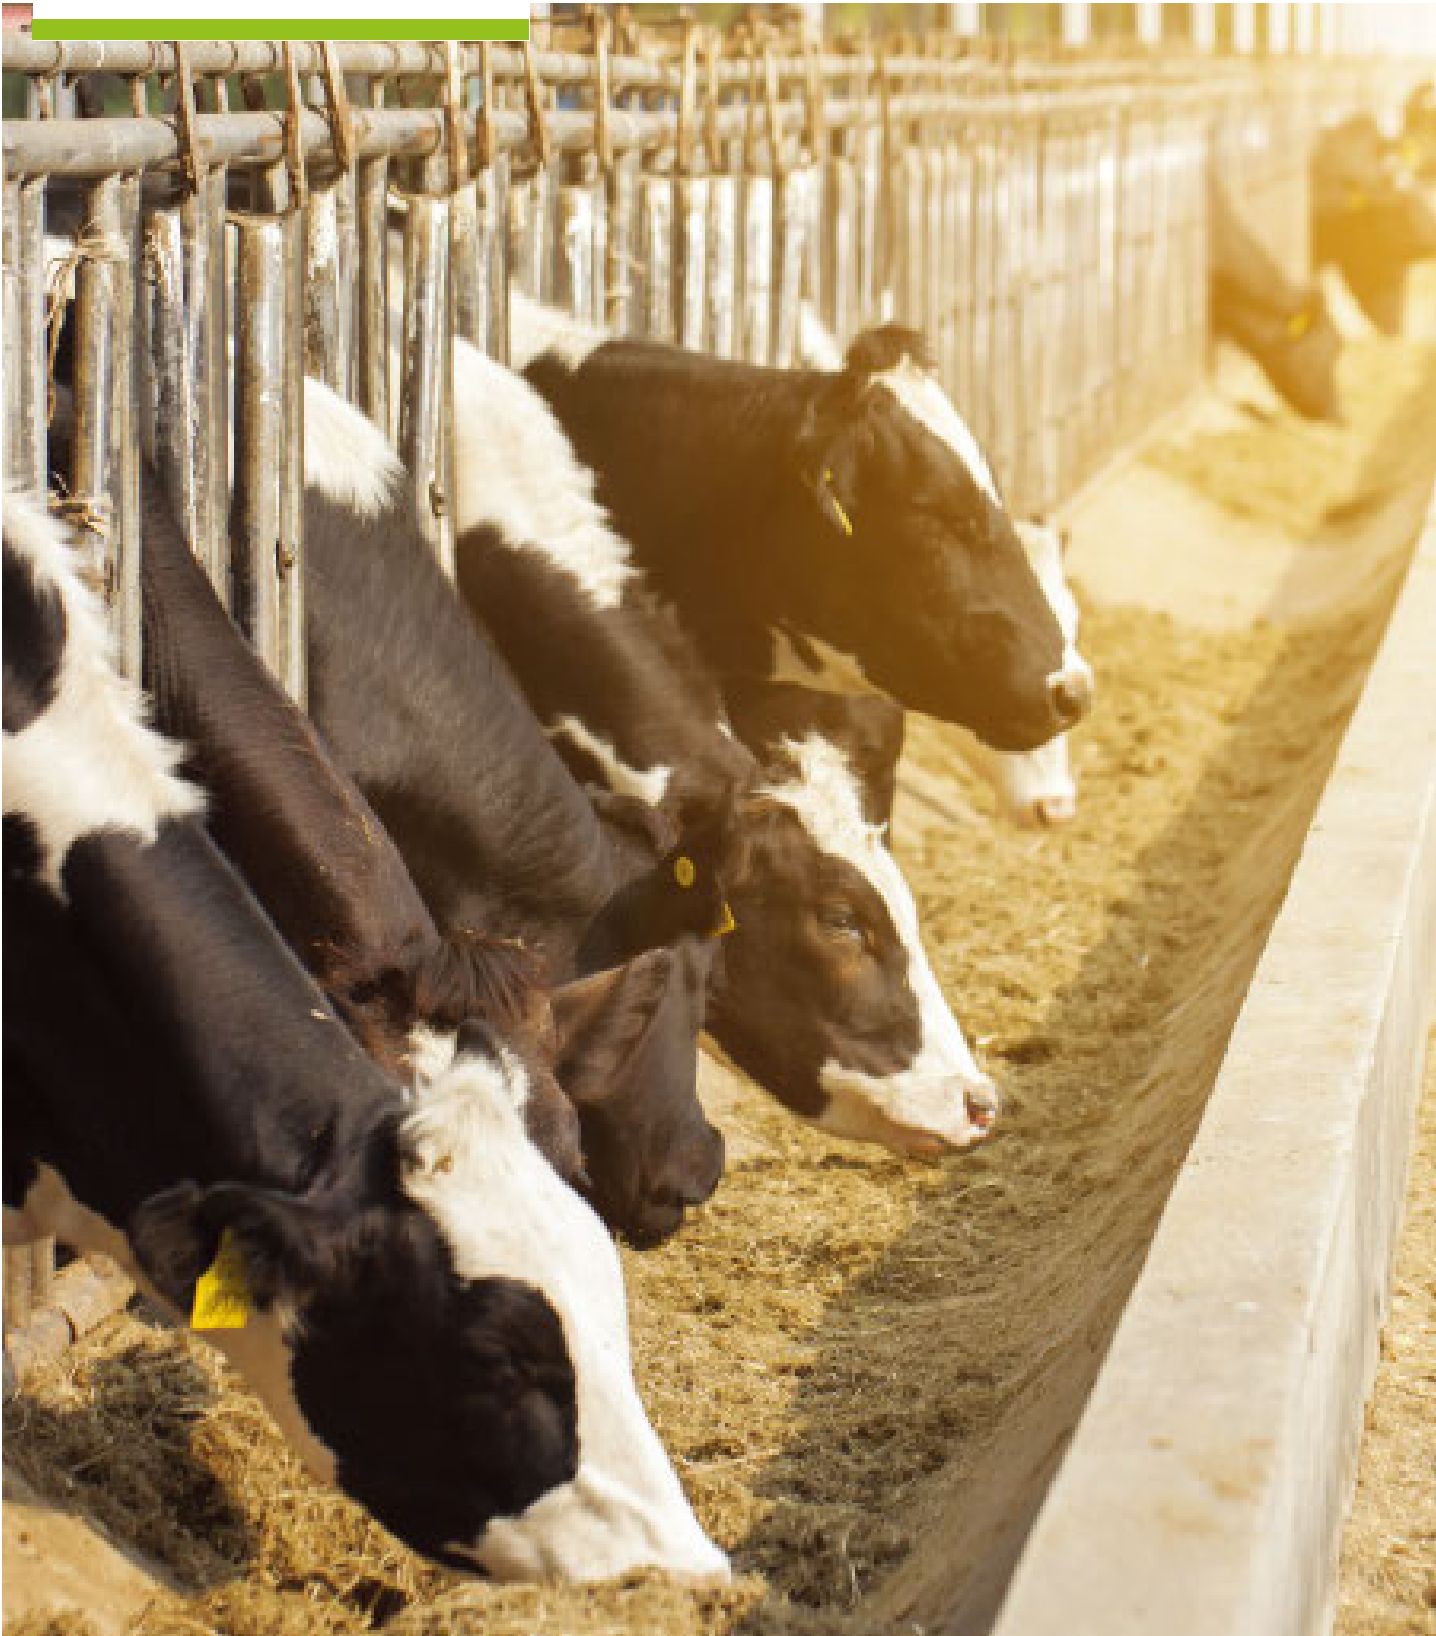

Optimize gut health
and function

Increase animal well-
being and performance

CATTLE FEED

AG-010

4% dairy cow premixed feed additive

Advantages of using dairy cow premix:

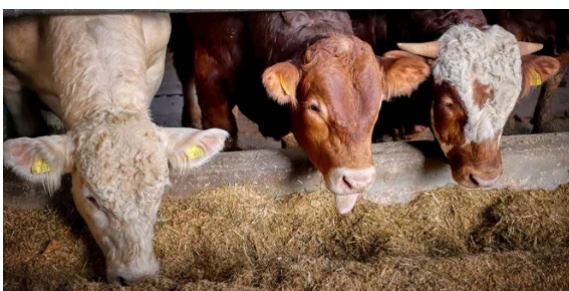

1. Precise nutrition: Formulated according to the needs of dairy cows at different stages, containing various vitamins, minerals, etc., with a reasonable proportion.
2. Improve milk production performance: Promote mammary gland development, increase production, optimize milk components, and improve quality and competitiveness.
3. Ensure the health of dairy cows: Vitamins, minerals, etc. maintain physiological functions, strengthen immunity, and benefit bone health.
4. Convenient and flexible: Easy to use, mix with basic feed according to the instructions, and the formula can be adjusted as needed.

AG-011

Nutrient-rich All-purpose High Efficiency Cow feed premix cattle feed

Beef cattle premix has many advantages. In terms of nutrition, it contains a variety of vitamins and can prevent problems caused by the lack of trace elements. It is highly targeted and designed according to different growth stages of beef cattle. For example, the premix for calves strengthens the supply of protein and other substances to promote growth and rumen development. It is convenient to use and can be simply mixed with other feeds, saving time and energy and ensuring stable nutrition. It can also improve meat quality. Adding antioxidants can extend the shelf life, improve meat color and enhance quality.

CHICKEN FEED

AG-002

5% high-efficiency broiler premixed feed, broiler feed.

Advantage:

- Balanced and rich nutrition
- Improve the survival rate of chickens
- Promote growth and development
- Improve feed utilization
- Improve intestinal health
- Promote rapid growth
- Boost immunity
- Reduce intestinal disease
- Improve aquaculture efficiency

Specification: 25kg

Shelf Life: 180 days

Ingredients: Vitamins, trace elements, amino acids, minerals

Content: Additive premixed feed

AG-003

5% premixed feed for laying hens, laying hen feed.

Advantage:

- Promote opening.
- Accelerate peak ascent.
- The peak egg production rate can reach more than 98%.
- The peak period is 8-12 months.
- Reduce egg breakage rate.
- The egg is big and the shell is brightly colored.
- Low feed to egg ratio, saving 10-20% feed cost.
- Enhance immunity, reduce medication.
- Overweight at the time of elimination.

DUCK AND GOOSE FEED

AG-014

5% laying goose premixed feed, goose feed

I. Main Components:

Various vitamins: Vitamin A helps with mucosal and embryonic development. Vitamin D₃ promotes calcium absorption and strengthens eggshells. Vitamin E is antioxidant and enhances immunity.

Minerals: Calcium is the main component of eggshells and is beneficial for bones. Phosphorus works in synergy with calcium. Other trace elements have various functions.

Amino acids and other trace elements: Methionine and lysine affect protein synthesis and so on.

II. Product Advantages

- (1) Balanced nutrition
Precise formulation meets nutritional needs at different stages and makes up for the defect of single feed.
- (2) Improved laying performance
Increase laying rate and prolong the laying peak period.
- (3) Optimized egg quality
Increase egg weight, reduce eggshell breakage rate and improve nutrition inside eggs.
- (4) Enhanced health and immunity
Maintain metabolism and improve disease resistance.

AG-013

5% meat goose premixed feed, meat goose feed.

Advantage:

- Balanced and comprehensive nutrition.
- Promote growth and development.
- Accelerate growth.
- Improve meat quality.
- Increase resistance to disease.
- Improve feed conversion.
- Shorten the breeding cycle.
- Improve farming efficiency.

AG-016

5% premixed feed for meat ducks, meat duck feed

Advantage:

- Provide total nutrition
- Promote healthy development
- Increase the survival rate
- Improve feed utilization
- Increase resistance to disease
- Enhance the meat quality of the duck
- Reduce feeding costs

AG-015

Pre-mixed feed for laying-breed ducks

Advantage:

- Increase laying rate and hatching rate: Provide sufficient nutrition for breeding ducks, promote follicle development and embryo health, increase egg production and improve hatching success rate.
- Strengthen the constitution of breeding ducks: Contain various vitamins, minerals and amino acids, ensure health, enhance immunity and reduce diseases.

PIG FEED

AG-005

4% boar premixed feed.

Advantage:

- Extended service life.
- Boost immunity.
- Improve reproductive ability.
- Improve semen quality.
- Increases sperm count.
- Improve pregnancy rate.
- Reduce the occurrence of hoof disease.

AG-007

4% Gestating Sow Premixed Feed

Advantage:

- Improve pregnancy rate.
- Increase litter size.
- Reduce reproductive diseases.
- Eliminate hoof crack, constipation.
- Reduce heat stress.

AG-006

4% lactating sow premixed feed, sow feed

Advantage:

1. Comprehensive and balanced nutrition.
2. Promote milk secretion and improve milk quality.
3. Enhance sow health and reproductive performance.
4. Convenient to use and have good cost-effectiveness.

AG-008

4% premixed feed for growing piglets

Advantage:

- Promote growth and development.
- Improve feed intake and digestibility.
- Improve palatability.
- Safeguard intestinal health.
- Increased survival rate.
- Get in perfect shape.

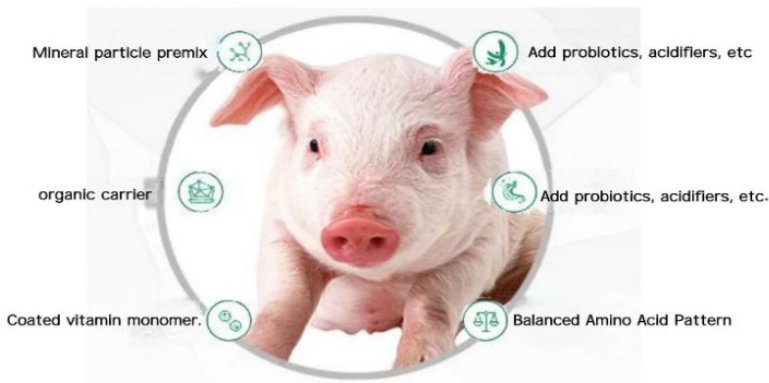

AG-004

Concentrated feed for fat pigs

Description:

Rich in protein and sufficient energy substances. It can ensure the operation of pig's body functions and make pigs grow faster. Effectively promote the appetite of pigs and improve feed conversion rate.

AG-009

Suckling pig feed

Advantage:

- Promote growth and development.
- Improve feed intake and digestibility.
- Improve palatability.
- Safeguard intestinal health.
- Increased survival rate.
- Get in perfect shape.

PIGEON FEED

AG-019

5% laying pigeon premixed feed

Description:

Advantages of pigeon laying premix:
comprehensive nutrition,
containing various key ingredients;
has functional additives; easy to use,
can improve laying rate and egg quality,
and ensure pigeon health.

AG-018

5% pigeon premixed feed

Advantage:

Comprehensive nutrition.
Additives can promote the growth of pigeons, enhance disease
esistance,
enable pigeons to be released in advance, help farmers improve
benefits and ensure the healthy growth of pigeons.

QUAIL FEED

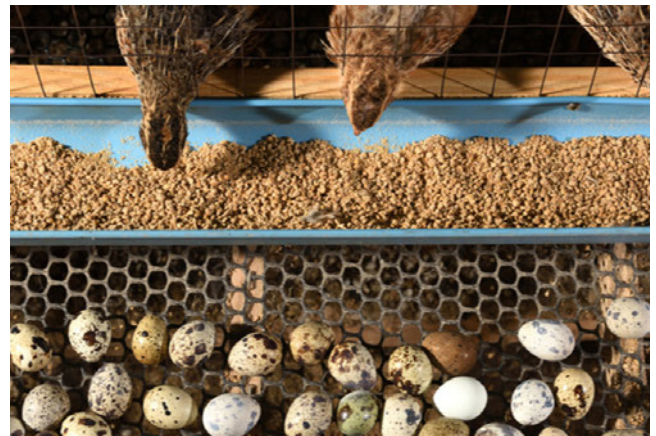

AG-019

5% laying pigeon premixed feed

Description:

It is nutritionally comprehensive and easily absorbed, enhancing the immunity to resist the invasion of diseases, enabling quails to maintain a good mental state and physiological functions.

It improves the laying performance, making quail laying more regular and frequent, increasing the quantity and quality of eggs and prolonging the peak laying period.
